

SAMS: The Student Advising & Management System

Your Virtual Filing Cabinet For Student Success

SAMS centralizes everything in one secure system

Advisors can manage documents, notes, forms, and meetings while administrators maintain full program visibility.

By bringing application and student data together in one place, SAMS gives teams a complete view of each student, improves collaboration, and supports better decision-making.

Centralized Advising & Documentation

SAMS serves as a secure, centralized system for all student records:

- ✔ Store documents
- ✔ Log advising notes and meetings
- ✔ Assign and track forms
- ✔ Keep communication connected to the student record

Performance & Progress Visibility

SAMS transforms academic data into clear, actionable insight.

Track grades over time, monitor milestone completion, and identify students who may need early support — all while giving leadership a comprehensive view of program-wide performance.

Leave of Absence, Simplified

LOA tracking is one of the biggest operational gaps in student affairs

- ▶ Track which students are on LOA
- ▶ Monitor return-to-curriculum status
- ▶ Document timelines and reasons
- ▶ Maintain documentation in one place
